Security organization worksheet exemplar

Part 1: Describe your security interests
● Cloud computing security ● Incident response ● Protection of sensitive data ● Raising security awareness
Part 2: Identify three organizations and include their mission or objectives
● **Organization 1: CSA - Cloud Security Alliance** ○ Dedicated to defining and raising awareness of best practices to help ensure a secure cloud computing environment ● **Organization 2: CISO Executive Network** ○ A peer-to-peer organization dedicated to helping information security, IT risk management, privacy, and compliance executives be more successful ● **Organization 3: NCSA - National Cyber Security Alliance** ○ Advocate for the safe use of all technology and educate everyone on how best to protect ourselves, our families, and our organizations from cybercrime.
Part 3: Write out which organization aligns with your interests and why
Organization 1: The CSA organization aligns best with my interest in cloud security because it specifically focuses on securing cloud computing environments. **Organization 2:** The CISO Executive network is catered toward security executives, and I am not on the executive level as of yet. So, that organization would not align with my current role or experience in the security industry. **Organization 3:** The NCSA organization seems like a good organization for general awareness and understanding but it is not specifically focused on my professional security interest in cloud security.

Best choice for my professional interests: I will research how to join the CSA to help me stay engaged with the security community.
