Parking lot USB exercise

Contents	Write **2-3 sentences** about the types of information found on this device. ● *Are there files that can contain PII?* ● *Are there sensitive work files?* ● *Is it safe to store personal files with work files?* *This USB drive contains PII such as family and pet photos. There are also some sensitive work files that include hire letters, shifts schedule and employee budgets.* *It is not safe to store both personal and work files together and each should be stored alone to prevent the breach of both if found.*
Attacker mindset	Write **2-3 sentences** about how this information could be used against Jorge or the hospital. ● *Could the information be used against other employees?* ● *Could the information be used against relatives?* ● *Could the information provide access to the business?* *This information could be used against employees because it will reveal their salaries. It could be used against relatives because it can include some sensitive personal pictures which might not be comfortable to share. This information could provide access to the system if the USB drive is infected and once plugged it could create an entry point to the attacker*
Risk analysis	Write **3 or 4 sentences** describing technical, operational, or managerial controls that could mitigate these types of attacks: ● *What types of malicious software could be hidden on these devices? What could have happened if the device were infected and discovered by another employee?* ● *What sensitive information could a threat actor find on a device like this?* ● *How might that information be used against an individual or an organization?* *The USB should not be plugged into the computer if found and should be given to the security team to view it.* *Personal and work USB drives should be separate and enforce a password to access the content of the USB.* *Computer software should be kept up to date and to make use*

	of firewalls and antivirus to be less vulnerable to attacks.
